

Scoping, Site Survey & Environment

The Bridge Marine Science Group provides specialist services to the Offshore Renewable Energy sector. Our expertise covers Scoping, Site Survey and Environmental Impact Assessment. We are focused on providing quality marine services and answering the needs of organisations and businesses worldwide.

Scoping

We can offer support services to offshore renewable energy projects in the scoping phase of their development. Specifically we can advise on:

- Project location
- Legislative background
- Wind resource & hydrography
- Tidal & Wave resources
- Coastal processes
- Physical Environments
- Biological Environments

Site Survey & Environment

We offer a full range of survey, monitoring and environmental services, from field sampling and analytical work to desk based EIA. Our work covers the full range of physical & biological environments.

- Water Quality
- Planktonic Communities
- Benthic Ecology
- Intertidal Ecology
- Fish & Shellfish Ecology
- Marine Mammals
- Ornithology
- Biodiversity & Habitat Mapping
